

Jashwa Santhanaraj

Full Stack Developer (MERN Stack) & Designer

jashwa46733@gmail.com | [Portfolio-Website](#) | [Linkedin](#) | [Behance](#) | [Github](#)

Objective

Enthusiastic and dedicated Full Stack Developer specialized in MERN Stack. Proficient in frontend and backend technologies with a focus on building responsive, user-friendly web applications. Adept in creating visually appealing interfaces, I am eager to apply my skills in a challenging development role.

Projects

Doll Delights - E-Commerce Website (MERN Stack)

<https://doll-delights.netlify.app/>

Built a full-stack e-commerce application using React.js for the front end and Node.js/Express.js for the back end.

- Implemented MongoDB for data management.
- Integrated Stripe for secure payment processing.
- Developed user authentication with login and sign-up functionality.

ClassyX Sneaker - E-commerce Website (MERN Stack)

<https://mern-classyx-sneakers.netlify.app/>

A fully functional e-commerce site built with the MERN stack, featuring detailed product pages, user login/signup, cart functionality, and comprehensive form handling.

- Implemented product listings through an API, allowing for dynamic content updates.
- Developed an admin panel for managing product listings, including editing, deleting, and updating products.
- Emphasized good UI design to enhance user experience with separate product detail pages.

MVC Projects (June 2024)

[MVC-Project-1](#) | [MVC-Project-2](#)

Created two MVC (Model-View-Controller) projects:

1. **Pet Fund Collection Site**
 - Developed a donation platform using Node.js and MongoDB.
 - Designed intuitive user interfaces with EJS templates.
 - Ensured secure data storage and retrieval with MongoDB.
2. **Job Application Form**
 - Built an interactive job application form using Node.js, Express.js, and MongoDB.
 - Implemented form validation and efficient data management.
 - Enhanced user experience with a clean EJS-based design.

MERN TODO Website (June 2024)

<https://todo-mern-app07.netlify.app/>

Implemented a task management application using the MERN stack.

- Utilized MongoDB for efficient data storage and management.
- Developed RESTful APIs with Express.js for task operations.
- Created a responsive user interface with React, enhancing overall user experience.

Technical Skills

- **Front-End:** HTML5, CSS3 (Bootstrap, Tailwind CSS), JavaScript (ES6+), jQuery, React.js, Redux, React Native, Responsive Web Design, Cross-Browser Compatibility, Performance Optimization, Accessibility
- **Back-End:** Node.js, Express.js, RESTful APIs
- **Database:** MongoDB, Mongoose
- **Tools & Libraries:** Figma, Adobe Photoshop (Web Design & UI/UX), Git, GitHub
- **Others:** Problem Solving, Verbal Communication, Accounting

Education & Certification

- **Bachelor of Commerce (B.Com)**
St. Thomas College of Arts and Science, 2023
- **Full Stack Web Development and Designing**
WEB D School, 2024
